WORK EXPERIENCE

● Front end Developer Intern

EXECUTIVE LIS
GAUTENG

01/2021 to 05/2022

In my position as front end developer at Executive Lis I was working on dashboards and user interface using bootstrap as my main design. we have meetings and code reviews every second day to see how far are you with your work and work in teams to achieve the goals which we are given by the senior developer. we always make sure that the work is completed before the senior developer presents it to the client. before we work we plan by writing down deign briefs before doing the code to know exactly what is required from us Been exposed to react.js ,node.js , JavaScript and visual studio code. main hooks we use is use state hook

● Front end Developer Intern

UCPRO
GAUTENG

10/2021 to 04/2022

In my position as a front end developer at UCpro i was lead by the senior developer taking the ux/ui design to develop a admin/dashboard for the client he was working with. i was in a team of developers who was a international group from the African and Asian content. we worked in two teams front end which i was a part of and back end which we worked with. we used the following technologies react.js ,visual studio code as well as redux tool kit to achieve the objective head of us.
